

Commercial Energy Monitoring Kit

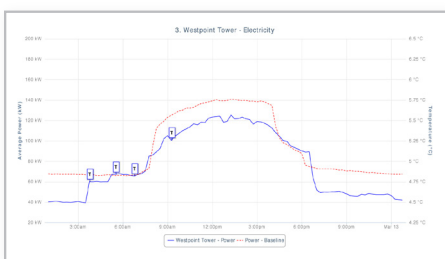

Portfolio Views: Organizations with multiple buildings can pinpoint star performers and efficiency opportunities with the performance ranking view. Benchmarking compares facilities against one another based on a variety of indicators such as consumption and energy intensity.

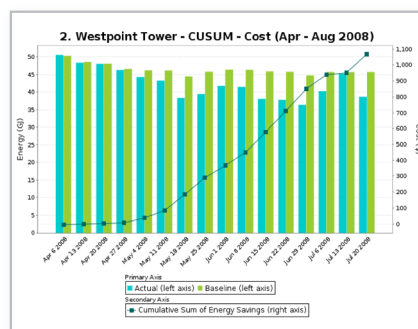

Improving energy performance in commercial portfolios doesn't have to be complicated. Obvius has partnered with Pulse Energy, a leader in Energy Management Software, to deliver the Commercial Energy Monitoring Kit: a web-based energy monitoring and analysis package shipped to your doorstep.

The Commercial Energy Monitoring Kit is the easiest and most cost-effective way to start delivering energy insights anywhere, anytime. Energy managers, executives and other key stakeholders benefit from energy insights and tools for their building or portfolio, to manage costs and increase energy productivity.

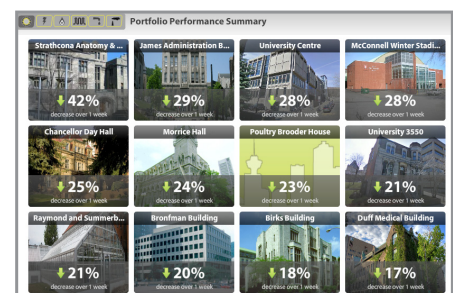

The Commercial Energy Monitoring Kit features

Detailed Analysis: Pulse™ software provides advanced users with powerful views to gauge their energy performance. Specific loads and zones with sub-metering can be isolated to provide deeper insight to disaggregated load and measure savings from specific conservation measures.

Flexible Reporting: Users can be confident that they have the energy information required when they need it by receiving customized reports, straight to their inbox at the predetermined time of their choice.

Engagement Dashboard: The Pulse Engagement Dashboard features performance views to highlight, contrast and compare energy data. It can be easily configured to represent the customer's brand, and provides interactive energy tips and sustainability information.
